

## Stainless Steel Post & Rail

## CROWD CONTROL SOLUTIONS

TURNSTILES' Stainless Steel Post and Rail system was created to give our customers an all in one solution for their crowd control needs. Our double line stainless steel rail fit seamlessly with our Turnstiles and ADA Security Gates or as a stand alone system. TURNSTILES' Post and Rail system can be used as crowd control for patron queuing and patron directional guides or as guides for turnstiles. The stainless steel construction allows for outdoor or indoor use and a wide range of applications from theme parks to executive office areas.

### APPLICATIONS

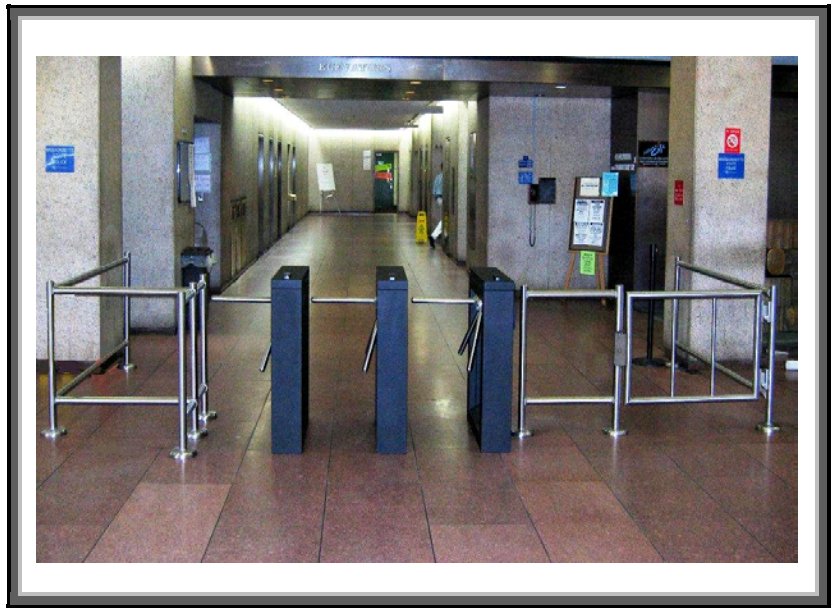

TURNSTILES' Post and Rail system provides security admission and crowd control for convention centers, health clubs, sports facilities, stadiums, amusement parks and office buildings.
